

TECHNICAL DIRECTIVE

Configuring GTI-PC for Golf or Landscape Applications

January 2015

GTI-TD-017-0115-GB

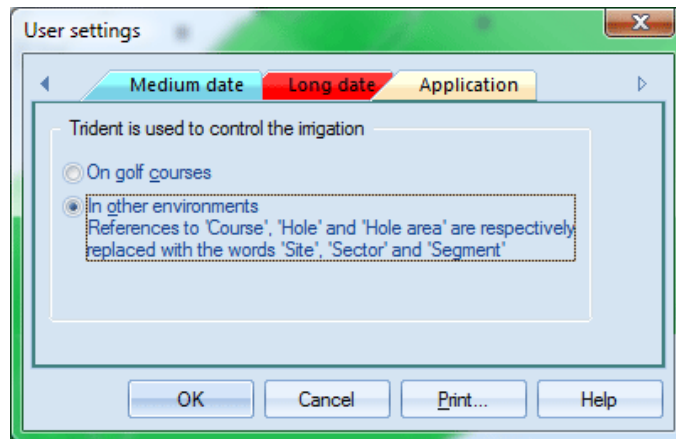

Distribution Regions: All Regions

Product Relevance: PC only

For use by: Distributors, Consultants, Contractors and End Users.

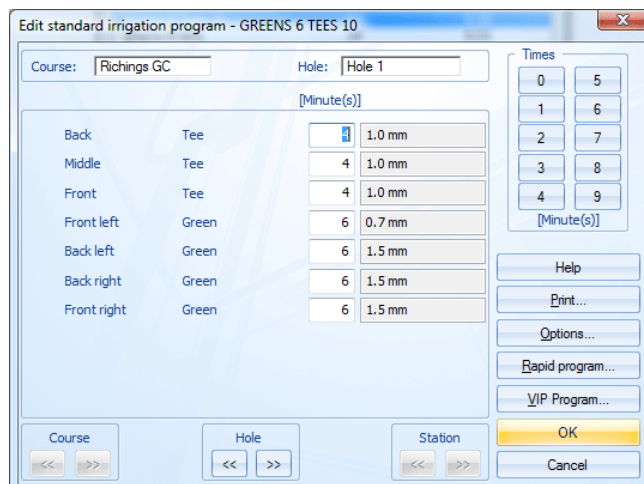

The GTI-PC Software is designed to cater for golf as well as landscape applications. Both application types use different terminology.

The application type is selected in the **User settings** window:

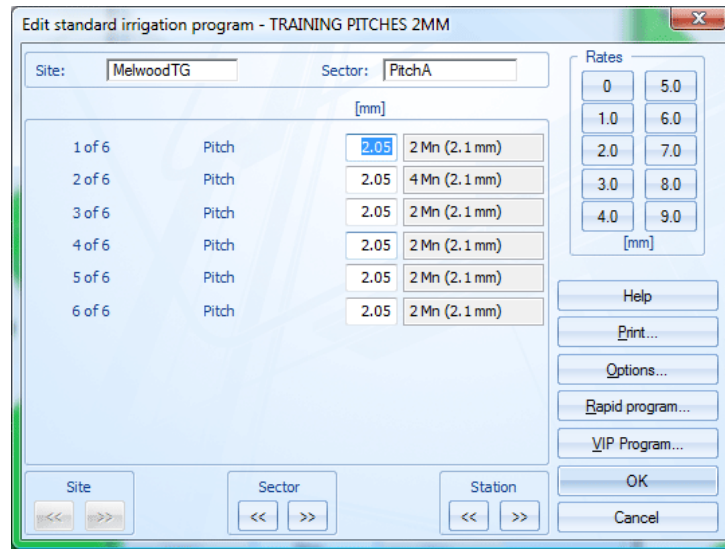

Changing the application type takes effect immediately. The above window is accessible at all times

This picture shows an example of a window when GTI-PC is configured for a golf course application:

The same window, but this time the GTI-PC Software has been configured to irrigate the grounds of a football club:

Similar adjustments are also made throughout all windows and menus found in the software
