USB Serial Port Adaptor

March 2020

GTI-TSB-042-0320-GB

Distribution Regions: All Regions

Product Relevance: PC only

For use by: Distributors, Consultants, Contractors and End Users.

As new computers no longer have serial ports, Bailoy now supply a USB to 9-pin serial port adaptor and it is compatible with Windows 8.1 and 10.

We do not recommend an alternative adaptor is used as the ones we supply have been tested for use with GTI systems

The Bailoy part number for this adaptor is **GTI-USB-SPA**

The USB-serial port adaptor **MUST** have the driver installed prior to inserting the USB-Serial Port adaptor into the computer.

The driver is supplied on the GTI-PC V3.xx software installation CD or USB Card.

- **Communication between Computer and DOU:**
USB-serial port adaptors can only be used with GTI-PC software V3.00 and later.

- **Communication between computer and DTMF Interface:**

USB-serial port adaptors can only be used with GTI-PC software V2.62 and later.

The discontinued RS232C fibre-optic adaptor can **NOT** be used in conjunction with any USB-serial port adaptor.
