

TECHNICAL SALES BULLETIN

Sites with No Internet or Poor Signal

July 2020

GTI-TSB-088-0720-GB

Distribution Regions: UK only

Product Relevance: PC, EC

For Use by: Consultants, Distributors, Dealers, Contractors and End Users.

Bailoy now offer a solution for sites that either do not have internet where the computer or tablet is installed or want a stand-alone internet separated from the sites main network.

By having an internet connection, sites can take advantage of REACH remote access* to run their system as well as taking advantage of email alerts and automatic database updates**. It also assists us when supporting or updating your system saving time, minimising site visits and getting you up and running as quickly as possible.

The router will function exactly like a standard broadband modem and have the following features:

- LAN Socket For PC, Printer, Etc
- Wi-Fi
- Has standard business firewall.
- Will allow VPN passthrough.

It uses a full Size 4G Sim card which can be from a network of your choice or you can top up the PAYG SIM supplied by us.

The modem also comes with several different indoor aerials which should be adequate for most environments but if the signal is not good then an optional external aerial can be supplied.

For further information including prices, contact Bailoy or an appointed contractor

*Annual subscription required

**Standard features with GTI-EC Pro, one off unlock key required for GTI-EC Lite users
